

Pay attention to your pancreas

To find out more about pancreatic cancer and other symptoms, visit gicancer.org.au/attention

We're working towards better treatments

Being diagnosed with pancreatic cancer can be devastating. It affects loved ones, families, friends, and entire communities.

People with pancreatic cancer deserve better quality of life and a better chance of survival.

We research pancreatic cancer for this reason - investigating new, potential treatments through our clinical trials.

Learn more about our current research at gicancer.org.au/pancreatic-trials

GI Cancer Institute raises funds and awareness of gastro-intestinal cancer and develop best practice clinical trials for people with gastro-intestinal cancer.

Is your pancreas trying to get your attention?

Symptoms of pancreatic cancer often go undiagnosed in the early stages of the disease.

That's why it's important to pay attention to your pancreas and check for symptoms.

Symptoms can include:

- Loss of appetite and weight loss
- Upper abdominal pain or back pain
- Yellowing of skin or eyes (Jaundice)
- Nausea and vomiting
- Change in bowel habits including diarrhoea, constipation or the feeling of incomplete emptying
- Pale and greasy stools
- Severe back pain
- Onset of diabetes (10-20% of people with pancreatic cancer develop diabetes)
